

## Pro-Active Maintenance Plan

Sonora Communications, Inc. desires to provide the very best service and support to its customers. We are breaking with past methods of reactive support due to requests from our customers. Our customers are asking for proactive support. Our goal is to help you avoid problems in the first place, rather than deal with them after they happen.

We have always explained to our customers the value in proactive methods: **computing costs are lower using proactive methods**. We now have a better plan to give you the type of support you've been asking for, a plan that's easy to understand and easy for you to participate in.
